WS-04 adapter

index: WAADAWS04

WS adapters are highly valued and practical accessories. They enable user a quick and easy measurement in a UNI-Schuko socket without the use of probes or test leads. Interaction with the measuring device is possible through a multi-plug connector. WS-04 is equipped with an angled plug.

MIC-30

Measurements of multicore cables

Depending on the measurement facility and the established standards (each conductor to each or conductor to other shorted and grounded conductors), the measurement of the insulation resistance of wires or multi-core cables requires several connections. In order to shorten the measurement time and eliminate the inevitable connection errors, Sonel recommends an adapter that switches between individual pairs of conductors for the operator.

AutoISO-2511 adapter

index: WAADAAISO2511

Designed to measure the insulation resistance of cables and multi-core wires with a measuring voltage of up to 2500 V. The use of the adapter eliminates the possibility of making a mistake, and significantly reduces the time needed to measure the insulation resistance between pairs of conductors. For instance, for 4-core cables, the user will perform only one connection operation (i.e. connect the adapter to the facility), while AutoISO-2511 will perform crossing for six consecutive connections.

Accessory dedicated for:

MIC-2511

AutoISO-5000 adapter

index: WAADAAISO50

Designed to measure the insulation resistance of cables and multi-core wires with a measuring voltage of up to 5000 V. The use of the adapter eliminates the possibility of making a mistake, and significantly reduces the time needed to measure the insulation resistance between pairs of conductors. For instance, for 4-core cables, the user will perform only one connection operation (i.e. connect the adapter to the facility), while AutoISO-5000 will perform crossing for six consecutive connections.

Industrial socket adapters
AGT-16T adapter

AGT-32P adapter

AGT-63P adapter

Adapters enabling the connection of instruments to single-phase or three-phase sockets in industry environments. Offered in three current load versions – 16 A, 32 A and 63 A – as well as variants with 4 and 5 pins for the 3-phase outlets.

Name	Intended use	Index

ST-1 probe

index: WASONT1

An important aspect of the process of determining insulation resistance is the reference temperature at which manufacturer of the tested facility conducted tests. The measurement result shall be corrected with the correction coefficient for the actual facility temperature. This parameter is measured by the ST-1 probe.
For example, is the reference temperature of the facility is 20°C, and the measurement was carried out in other conditions, the obtained result shall be calculated to the reference temperature by using the proper temperature correction coefficient.

Tools for measurements in EPA zones and beyond

PRS-1 probe

index: WASONPRS1

If the site insulation is used as a means of protection against electric shock, the insulation resistance of floors and walls should be checked with an appropriate measuring instrument using a probe dedicated for this purpose.
PRS-1 has the shape of an equilateral triangle and has been made according to the guidelines provided in for in the HD 60364-6 and EN 1081 standards. Legs of the probe were made with a special rubber mix – volume resistance of a single leg does not exceed 5 kΩ, and the hardness is in the range between 50 to 70 IRHD. With appropriate pressure on the probe, such a design solution will ensure approx. 900 mm^2 contact surface area with the tested plane.

PRS-2 probe

PRS-2 probe

PRS-2 KIT probe

The probes in the **PRS-2** kit are used to measure surface and material resistance values. They are precisely manufactured, in accordance with the guidelines of international standards, incl. IEC 61340-5-1, IEC 61340-5-2 and ANSI/ESD S20.20.

The PRS-2 stands for:
- 2x double-sized ring-shape measurement probe (counter-electrode),
- circular probe (counter-electrode),
- 2x pressure weight,
- insulating plate,
- 3x test lead 1.2 m,
- test lead 10 m on a reel,
- distance line 25 cm.

Adapter with pin probe

index: WAADAWS11

The WS-11 adapter is an automatic three-wire pin probe. It provides much faster measurements by its start button located on the adapter housing. The adapter also has a button that allows user to save the measurement result in the memory of the meter. The probe used during measurements in electrical installations reduces to a minimum the operations performed on the meter itself, significantly improving the efficiency of work.
Measurement category acc. to EN IEC 61010-2-030:
· With limiter on measuring end: CAT IV 600 V / CAT III 1000 V
· Without limiter on measuring end: CAT II 1000 V

CS-1 cable simulator

index: WAADACS1

Designed for insulation resistance simulation of power cables. Equipped with highly accurate resistors. Intended for training, presentation and auxiliary purposes – for instance in a situation, where general estimation of the measurement correctness is needed.

CS-1 enables the measurement of four resistance values and their combination. The device utilizes 4 mm banana plugs. Its casing is characterized by high resistance to mechanical damage.

CS-5kV calibration box

index: WAADACS5KV

The calibration box has been designed to verify indications of insulation resistance meters. The use of high-quality resistors with a very high degree of accuracy makes the CS-5kV an ideal tool for cooperation with devices with a test voltage of up to 5 kV DC.

The box enables the measurement of four resistance values and their combination. The device utilizes 4 mm banana plugs.

Sonel Reports PLUS

index: WAPROREPORTSPLUS

Sonel Reports Plus supports creation of documentation after testing of electrical installation. The software communicates with Sonel test instruments, downloads data from memory of the devices and creates necessary documentation. Many useful functions are included in order to help creating documentation of the measurements. Sonel Reports Plus supports the meter by reading, downloading and uploading test structure from/to test instrument.

Features:
- every report can contain description page,
- tree structure presents a clear picture of the tested building and its rooms. Test structure can be uploaded to the meter and downloaded from it together with test results,
- user can print labels for test points,
- for every room user can add picture or scheme of electrical installation,
- software contains library of fuses,
- for every room user can create separate table with test results.

Power supply adapter AZ-3

index: WAADAAZ3

Mains plug with banana sockets. It enabling the charging of the analyzer batteries from the power supply socket, while eliminating the need to connect the instrument to the measured object. It is particularly useful when copying data, analyzing results or transferring the configuration: there is no risk of the device battery unexpectedly discharging when performing such operations. The product can also be used for measuring voltage signals. In addition, it will facilitate the work of taking measurements in EPA areas: when measuring point-to-ground resistance (R_{P-G}), it will enable the insulation resistance meter leads to be quickly connected to the nearest ground point and to the ring-shape probe.
