

## See the sound and save money

## Features

Sonel KUS-100 acoustic imager, with the help of a **built-in microphone array**, effectively detects sources of acoustic emission such as leaks of compressed agents in industrial installations or partial discharges in the power utility industry. It is a vital diagnostic tool, allowing significant savings by reducing energy losses.

The imager operates in two detection modes: leakage and partial discharge. It has the ability to manually tune the detected frequencies and change the sensitivity level to avoid unwanted reflections and interference. Comfort of use is improved by a touch screen and a convenient strap mounted to the housing.

Power supply system
Power supply 5 V DC/ 2 A (charging via USB)
Battery type Dismountable and rechargeable Li-Ion battery
Battery operating time Approx. 3.5 hours
Battery charging time 5 hours to full charge
Communication
Ni-Fi         802.11 b/g/n (2.4 GHz and 5 GHz)
JSB interface USB Type-C
HDMI interface HDMI-D
Invironmental conditions
Protection level IP40
Operating temperature     -20°C50°C   -4°F122°F
Storage temperature     -20°C60°C   -4°F140°F
Relative humidity         <95% without condensation
Drop test height         1.2 m   3.94 ft
Safety IEC 61010-1
