

Specialist in residual-current devices

Features

- **Testing RCD breakers of AC, A, B types**
 - Testing of general, short delay and selective RCDs for the rated current values 10, 15, 30, 100, 300, 500 mA
 - Measurement of I_A trip current and tripping time t_A for currents $0.5 I_{\Delta n}$, $1 I_{\Delta n}$, $2 I_{\Delta n}$, $5 I_{\Delta n}$
 - R_E and U_B measurement without RCD tripping
 - Extended AUTO function of RCD measurement, with the possibility of measuring Z_{L-PE} with low current
 - Measurement of I_A and t_A during one RCD tripping

Additional functions

- Checking the correctness of PE connection using a contact electrode
- Measurement of voltage (0 ... 500 V) and network frequency
- Memory of 990 results
- Wireless data transmission to a computer
- Backlit keypad

Application areas

The meter enables the user to measure the parameters of residual-current devices (RCDs), such as time or operating current. The device is useful for testing electrical systems with circuits protected by RCDs of AC, A and B type.

Increased resistance to environmental conditions

The meter will cope well in difficult environmental conditions. Protection against penetration of dust and water is ensured by a unique housing with a level of protection IP67.

Communication and software

You can easily transfer measurement data to your computer via wireless communication. In order to generate a report on measurements for electric shock protection, use **Sonel Reports PLUS** software. Saving the downloaded data to the simplest formats and printing is provided by free **Sonel Reader** software.
